COURSE CODE: **TM112_1**

Introducing computing and IT

<https://www.open.edu/openlearn/digital-computing/introducing-computing-and-it/content-section-0>

Course summary

Explore how computing and IT shape our digital world with this free introductory course. Learn how computers work, how data is stored and deleted, and why online safety and data security matter while gaining a deeper understanding of how technology influences the way we live and think.

Learning outcomes

By completing this course, the learner should be able to:

- understand the idea of a 'digital world'
- explain the role of computing and information technology (IT) in a digital world
- understand the importance of keeping safe online
- understand how the use of online search engines can influence your beliefs and actions
- describe how data are stored on and deleted from a hard disk drive (HDD)
- describe how data are stored on and deleted from a solid state drive (SSD).

Completed study

The learner has completed the following:

Section 1

Computers: from rarity to ubiquity

Section 2

Some aspects of our information society

Section 3

Participating in a digital world

Section 4

Are search engines bad for your health?

Section 5

Hard disk drives: a conversation

Section 6

Solid-state drives: The conversation continued
